

# New Workflows and Tools for ETD Support at the University of Florida

Christy Shorey (UF) and Mark Sullivan (Sobek Digital)

# Contents

- Introduction to IR@UF & SobekCM
  - Tour of public functionality
  - Workflow overview
  - Related projects and future considerations
- 

# Introduction to UF@IR and SobekCM

# Brief History of IR@UF

- 2006 – created IR@UF as collection within UFDC
  - mediated deposit
- 2008 – start of RDS project, files into IR@UF
- 2009 – self-submittal tool via myUFDC
- 2009 – began hosting PILOs
- 2011 – began hosting supplemental data
- 2012/2013 – systemize ETD ingest into IR
- 2013/2014 – harvest earlier ETDs into IR

# IR@UF Today

- Content
  - 41,972 items in 28,329 titles
  - Over two million pages
  - Over 15 thousand theses and dissertations
- Usage
  - Over 14 million views
  - Almost 1 million visits

# SobekCM

- Open source, integrated workflow, tracking, management, and presentation for digital resources of all types.
  - Photographs
  - Books
  - Newspapers and serials
  - Aerial imagery with geographic searching
  - Museum objects
  - Theses and dissertations

# Brief History of SobekCM Development

Year	Accomplishment
2006	<p>SobekCM First Released</p> <ul style="list-style-type: none"><li>• Display layer over Greenstone Digital Library</li><li>• Written in C#, served by Windows IIS</li><li>• Based on MODS/METS</li></ul>
2011	<p>Version 3.0 Released</p> <ul style="list-style-type: none"><li>• Second major rewrite</li><li>• No longer dependent on Greenstone Digital Library</li><li>• Integrated tracking and workflow</li><li>• SobekCM Released as Open Source</li></ul>
2013	<p>Version 4.0 Released</p> <ul style="list-style-type: none"><li>• HTML5 / CSS3</li><li>• Online Quality Control</li></ul>
2014	<p><i>Sobek Digital Hosting &amp; Consulting</i> created to offer hosted solution</p>

# SobekCM Today

- Over 10 million pages
- Housing content from over 100 institutions
- Over 200 million hits
- Approximately fifteen independent instances

SEARCH ►

Search Options 

- Precision:  Contains exactly the search terms  
 Contains any form of the search terms  
 Contains the search term or terms of similar meaning

## Quick Tips

## ❖ Boolean Searching

Use + or **and** between terms to find records with **all** the terms.  
Use - or **or** between terms to find records with **any** of the terms.  
Use ! or **and not** between terms to exclude records with terms.  
If nothing is indicated, **and** is the default.  
EXAMPLE: natural and not history

## ❖ Phrase Searching

Placing quotes around a phrase will search for the exact phrase.  
EXAMPLE: "natural history"

## ❖ Capitalization

Searches are not capitalization sensitive.  
EXAMPLE: Searching for *NATURAL* will return the same results as searching for *natural*

## ❖ Diacritics

To search for words with diacritics, the character must be entered into the search box.  
EXAMPLE: Searching for *Précédent* is a different search than *Precedent*

TRYIN' TO MAKE A DOLLA OUTTA FI'TEEN CENTS: WHY THE AFRICAN-  
AMERICAN CANON HAS WRONGFULLY EXCLUDED POPULAR URBAN  
LITERATURE

By

RACHEL A. ROBINSON

Search Collection:

Go

### Background

The Digital Repository project of the [Jane Bancroft Cook Library](#) was designed to create a digital library of locally produced materials for use by the broader scholarly community. The project goal is to build an electronic platform for depositing, accessing and archiving institutionally produced materials. These materials include archival materials, teaching objects, research papers and articles, and data in the form of digital text documents, images, sound recordings, and other digital assets created by members of the New College community through their research and teaching. These materials will represent the intellectual and cultural output of Florida's public honors college.

### Theses

The first collection loaded into the NCF Digital Collections was the New College Student Theses Collection from a legacy system. From 1967 through 2008, students only turned in print theses, which the library has bound and houses in a dedicated thesis room. From 2009 on, students are also required to submit an electronic thesis in PDF format in addition to the print version. These digital objects are loaded into the repository. From 1967-2008, the thesis database only contains citation information. From 2009 to present, it also includes the electronic PDF theses.

### Additional Content

In addition to the thesis collection, the NCF Digital Collections also collects materials from the library's archives including:

- Student Publications
- Photographs
- Commencement Programs and Addresses

**New College**

# Workflow Overview

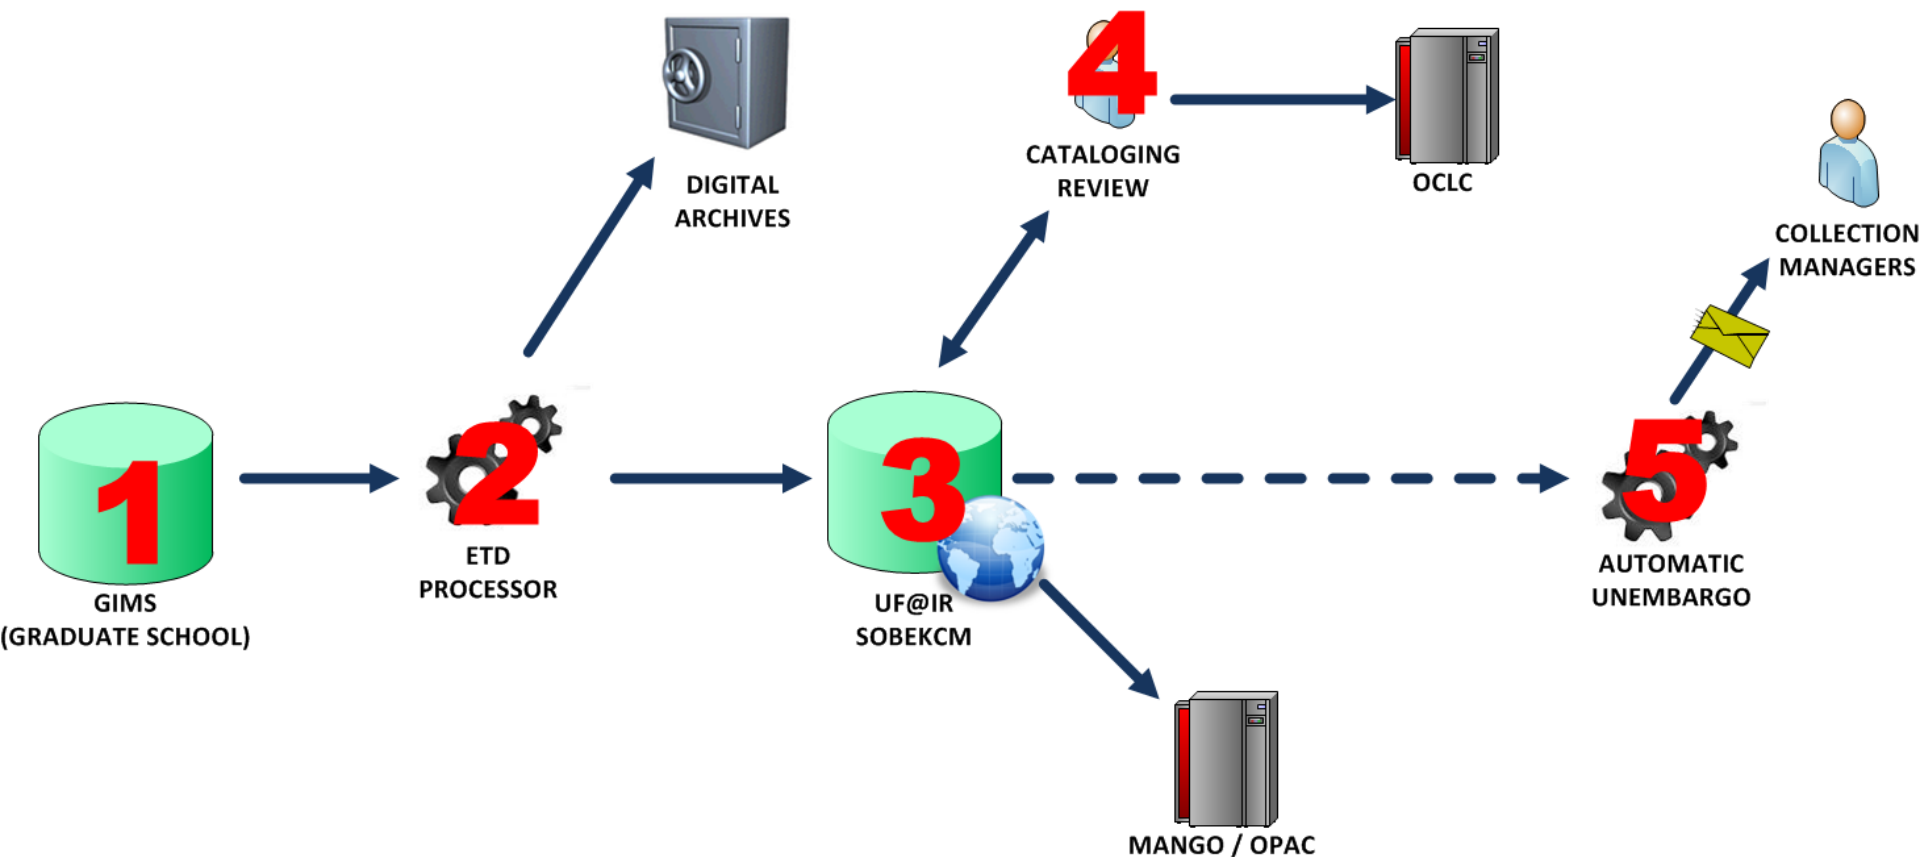

# Workflow Overview

# Workflow Overview

# Workflow Overview

1. GIMS ( Graduate School )
  2. ETD Processor
  3. Load into SobekCM
  4. Cataloger Review
  5. Online (lifecycle) Management
  6. Automatic Unembargo (optional)
- 

# 1. GIMS (from the Graduate School )

- Student submits ETD to Graduate School via GIMS
- ETD review process
- Departments submit defense forms, UF publishing agreement via GIMS
- GIMS pulls student information from university records
- Student graduates; GEO sends list to libraries
- Library reviews list
- GEO generates XML; validates through GIMS
- FTP files and XML to libraries
- XML is in MARC ready format

## 2. ETD Processor

- A. Loads the data from GIMS
- B. Validates, augments, and does some metadata correction
- C. Hides some metadata for DARK items
- D. Saves a (updated) METS / MODS digital resource package
- E. Includes “custom” metadata module
- F. Loads into archives and IR@UF / SobekCM

## 2. ETD Processor

- A. Loads the data from GIMS
- B. Validates, augments, and does some metadata correction
- C. Hides some metadata for DARK items
- D. Saves a (updated) METS / MODS digital resource package
- E. Includes “custom” metadata module
- F. Loads into archives and IR@UF / SobekCM

 520 3 |a Principal bundles have a well-known description in terms of nonabelian cocycles of degree 1 with values in a sheaf. A more general notion than that of a sheaf on a space  $X$  is that of a lien on  $X$ . A lien on  $X$  is an object that is locally defined by a sheaf of groups, with descent data given up to inner conjugation. Equivalence classes of gerbes with a given lien  $L$  are classified by nonabelian degree 2 cocycles. In his work, Lawrence Breen has given a similar classification of 2-gerbes using nonabelian degree 3 cocycles that take values in a family of group stacks. In our work, we defined the notion of a 2-lien on a space  $X$ . It is an object that is given locally by a group stack, with 2-descent given up to inner equivalence. We have proved some theorems about 2-liens of 2-gerbes which correspond to well known results about liens of gerbes. Also, Deligne has shown that any strict Picard stack  $G$  corresponds to a 2-term complex of abelian sheaves  $K$ . In this case we proved that  $H^3(X, G)$  is isomorphic to the hypercohomology group  $H^3(X, K)$ .

The record above was auto-generated from the METS file.

## 4. Cataloger Review

- A. SobekCM creates MARC report based on TKR/tickler field (per semester)
- B. Cataloging reviews the records for accuracy, versus the online digital resource, updating online record as necessary.
- C. MARC report is loaded to OCLC

# 5. Online (lifecycle) Management

- A. Aggregation behaviors
- B. Aggregation-specific Item Reports
- C. Item Metadata
- D. Item Embargo Date

(Currently students cannot change their embargo date in the online system .. must email )

The *University of Florida Theses & Dissertations Collection* within the *Institutional Repository at the University of Florida* will eventually include all theses and dissertations from the University of Florida. The collection currently includes:

- Open Access Theses & Dissertations, originally submitted electronically (ETDs)
  - Data, data sets, and supplementary data related to theses and dissertations
- [Projects in Lieu of Theses](#), submitted electronically but which would otherwise not be available online ([submission help](#))
- Retrospective dissertations, digitized from print-only dissertations ([information on this service for dissertation authors](#))
- [UF Undergraduate Honors Theses](#) (new in 2013/2014)

Usage statistics for each ETD are available under the "description," and overall usage statistics are available [here](#).

For dissertations not covered by the [Retrospective Dissertation Scanning Policy](#), thesis and dissertation authors can grant permissions to have their theses and dissertations added to the *University of Florida Theses & Dissertations Collection*. For print-only theses and dissertations, the permissions form and mailing address are available [here](#). Authors can also grant permissions and submit electronic theses and dissertations through the [online self-submittal form here](#).

## 6. Automatic Unembargo

- A. When embargo date is reached, material is automatically made public by the SobekCM Builder service.
- B. Notification email is sent to collection manager(s)
- C. Hidden metadata is loaded over “scrubbed” METS and reprocessed

# Related projects and future considerations

# RDS – Retrospective Dissertation Scanning Project

- 2006 – started scanning print dissertations upon author request
  - scanned in-house
  - Items hosted in IR
- 2008 – began RDS project in earnest
  - Scan majority with vendor
    - Items hosted on vendor site, and ingested into IR
  - Special items scanned in-house
    - Items hosted in IR

# RDS — Retrospective Dissertation Scanning Project

Metadata is collected from print records

- Sent to vendor
- Create catalog record for digital copy
- MARC records pulled to match to files ingested from vendor

# Terminal Projects of Different Flavors

## ETDs

- Permissions granted at submission, via GIMS
- File from GEO
- Metadata from GIMS
  - Into IR
  - To Cataloging to create MARC Record for ALEPH and OCLC
- May contain supplemental files
- May include embargo or other restriction period

## RDS

- Opt-Out policy
- Scanned at vendor, or in house
- Metadata from print catalog record

# Terminal Projects of Different Flavors

## PILOs

- Permissions granted at submission, collected by departments
- File from department
- Metadata entered based on file
- May contain supplemental files
- May include IP restriction

## Honors Theses

- Permissions granted at submission, by student
- File submitted by student
- Metadata entered based on file

# Terminal Projects

The goal is to get all terminal projects in the IR and manage them using the same tools. Looking at ways to normalize the metadata, and the workflows, so the user experience will be the same for all scholarly works.

# Supplemental Materials

Data      Videos      Audio      Code      Etc

- Self-submitted by graduate students into IR
- Student adds metadata and uploads file(s)
- Submission creates PURL which can be added to the body of the ETD
- Take advantage of hosting within robust digital library infrastructure

# Aerial photographs of Alachua County - Flight 2KK (1968)
